

## Low Rise Curtain Wall

### Description

Curtain walling systems gives you the flexibility to create impressive, high performing, functional low rise façades that are visually exciting, both internally and externally. The system is thermally broken and can incorporate fixed lights, opening vents and a full range of doors. Low rise curtain walling can be faceted, curved or angled and provide large expanses of uninterrupted glazing that create simple yet dramatic building envelopes.

### Applications

The Low Rise Curtain Walling system is flexible and versatile and can be specified for a range of applications including

- Ground Floor Treatments and shop frontages
- Hotels, office blocks, schools and car showrooms
- Public & Communal entrances
- Walkways, stairwells and atriums
- Low to medium rise
- Large expanse glazing

### Design Features

- Slim 55mm frame profile for increased glass appearance
