

## Window Walling

### Description

Our versatile window walling system provides a low cost alternative to curtain walling. A wide variety of framing options, structural Mullions, transoms and couplings make the system ideal for medium-rise applications. Incorporating both fixed light options and a range of openable sashes. It allows this flexible system to be tailored to any project. The system can incorporate a full range of accredited hardware including multi-point locks, folding openers, teleflex, lockable handles and trickle vents.

### Applications

The Window Walling system is flexible and versatile and can be specified for a range of applications including:

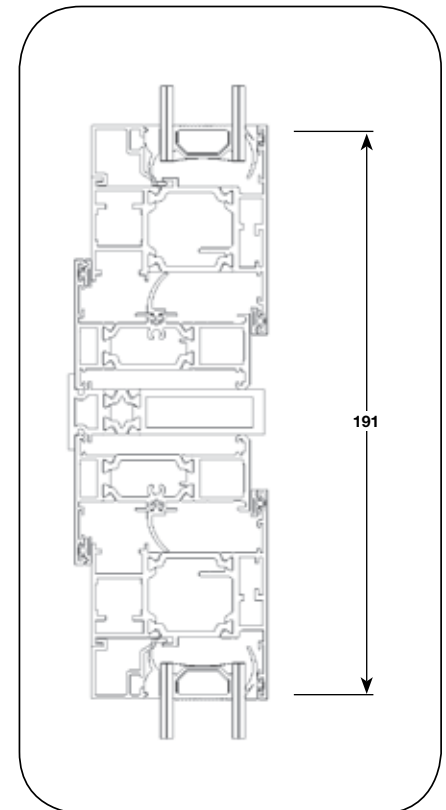

- New build or refurbishment projects
- Light, Medium and heavy duty commercial
- Hotels, office blocks, schools and industrial buildings
- Ribbons windows, stairwells and atriums
- Low, medium and high rise

### Design Features

- Secured By Design Licensed
- Kite marked to BS4873 & BS7950
- Internally or externally glazed options
- A range of coupling & mullion options to suit varying structural/wind load requirements
- Unique polyamide thermal break design to improve thermal performance

- Accommodates all standard hardware including Euro groove mounted locking systems
- Dedicated fixing straps for ease of installation
- Complies to Part L using standard hard coat glazing
- 58mm or 70mm frame depth to accommodate varying applications
- Accomodate 24mm - 44mm Sealed Units for thermal and acoustic performance
- Flat, chamfered or ovolo frames and vent details to achieve traditional or contemporary appearance
- Dual colour capability for variations internally and externally
- Fully compatible with the entire Beaufort Product Range
